

# The 24 June session of the CII REACH-OSH Forum was another success!

We are really pleased that about 60 experts from all over Europe joined us for the 24 June CII REACH-OSH Forum.

As a reminder, the aim of this Forum is to provide an informal platform for the European Commission, Member States' experts, trade union and industry representatives and other relevant stakeholders to exchange views and discuss solutions to clarify the REACH-OSH interface.

We would like to particularly thank Mr Linher from the European Commission and Dr Schlüter from the German Federal Institute for Occupational Safety and Health for their insightful presentations, which were important bases for discussions. We would also like to thank our three moderators, Caroline Braibant, Martin Wieske and Marko Susnik, for efficiently steering these debates.

During this Forum, we covered quite a broad range of topics, including:

- the European Commission's internal debates and work on the REACH review since the 1 April CII REACH-OSH Forum
- the potential role of the Candidate List in OSH prioritisation
- GRA and professional uses
- RMOAs and ARNs
- the European Commission's thoughts on how to best use substitution
- Germany's views on how to use REACH data for OSH
- the national REACH-OSH frameworks for self-employees

All the points mentioned above will be further discussed and explored during upcoming Fora. Indeed, as alluded to when concluding this Forum, we really count on the participants to build agendas that effectively contribute to clarifying the REACH-OSH interface.

The next CII REACH-OSH Forum is likely to take place at the end of September.
